

ICON-DESIGN

The task was to come up with an icon that had something to do with the theme chick, but creating a simple chick seemed too simplistic.

I tried to think out of the box and add more creativity to let flow into it.

Why not in combination, matching the later following dating app,
which reflects love and the music, but still reflects the chick/chicken.

The result shows the wonderful and creative combination of different objects,
how they perfectly melt into each other and reflect exactly what we want to expect.

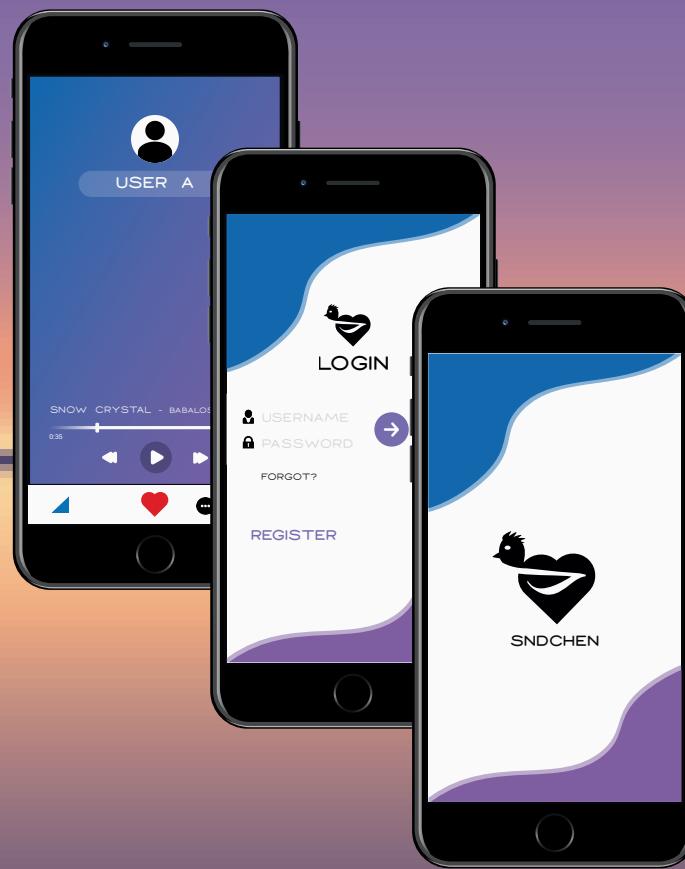

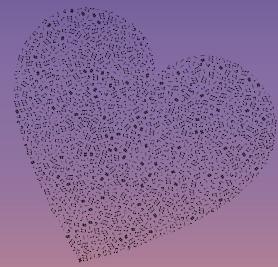

GRAPHIC DESIGN

POSTER-DESIGN

In this project it was important for me to try something new, something that challenges me in a new way but still reflects the desired effect. Here again LED effects are used in a new way and give specific information about the product. In the center, the highlight, perfected with the so-called glitch effect. For the right target group, the perfect eye-catcher.

The perfect app to fall in love,
with the help of the magic of
MUSIC

- original
- individual
- accessible
- efficient
- uncomplicated
- for all age groups
- newfangled design

COLOR COMPOSITION

This project represents a feeling of the gaming universe.
You can perceive the harmony of many graphic elements.
All together they reflect a part of the gaming world.
The color harmony of red and blue appear in many aspects
of the gaming world and are very essential
and also known to harmonize in this genre.
LEDs are in connection with game consoles also indispensable
and give you directly the whole gaming feeling at a glance.

3D MODELING

What was originally supposed to be a normal animated GIF with the robot theme, ended up being a dancing 3D animated robot. Again, I did not make it easy for myself, but I set the bar very high to get the best out of myself and the final product. However, I quickly found pleasure in modeling and animating 3D objects. So the many hours of work went by in no time at all and the final product is a pleasure to behold.
